

VERTICAL SCALE - HORIZONTAL SCALE

1-16-3

Figure 5a (to FER-146). Log of Orange Road site trenches T2and T3 excavated by Woodward-Clyde (Schwartz, et al., 1977). Material identified as colluvium of possible Holocene age shown in yellow; paleo-B soil horizon shown in red-brown; fault gouge in Mesozoic bedrock shown in blue. Refer to Schwartz, et al.(1977) for complete lithologic description. Bedrock unit 29 in T3 identified as Mesozoic metavolcanic rock. All other bedrock units identified as late-Cenozoic channel deposits-
